Nathan's Update

06/28/2016

Underground Update

Went underground for first time! Unfortunately until I complete all training I cannot go underground by myself.

Passed validation exams last Friday and practical training is scheduled for Thursday.

RAT Update

Wrote script in c++ to create histograms.

Here are two histograms from the ar39 simulation with 10000 events. First one is the full histogram and the second is just looking at 0 through 10 on the x axis.
