

SLAC Visit

The Phase 2 inner vessel just arrived

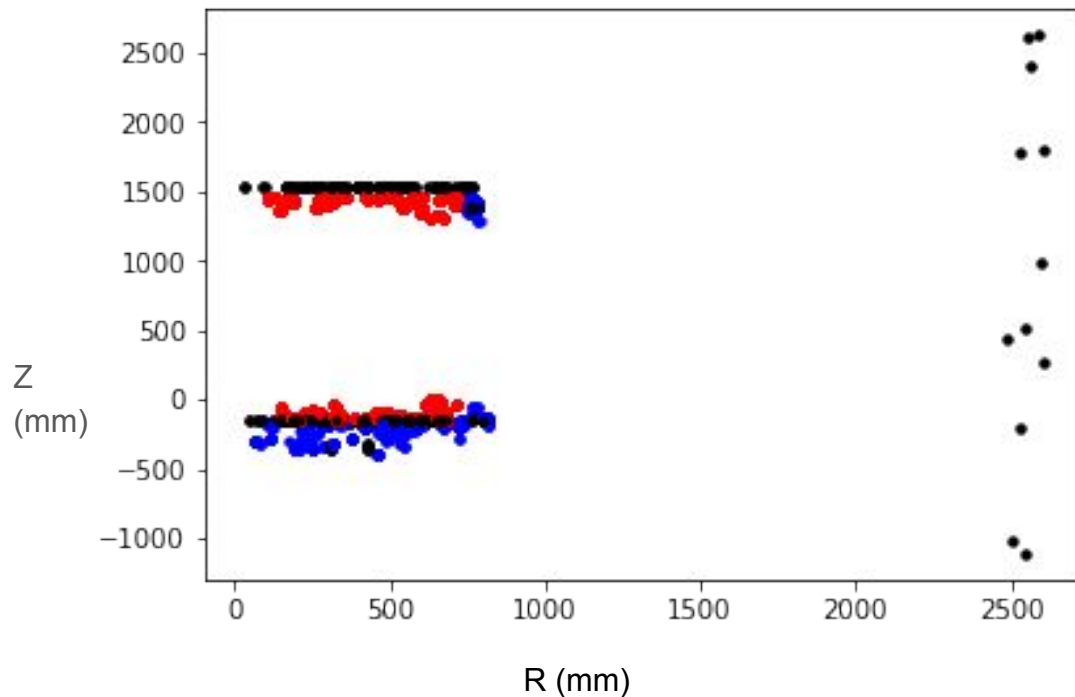

Purification
Tower

Phase 1

Bhwana's Code

- Does not work as I had planned
- When she wrote her code the location of the cathode had not been fixed so she needed to estimate the reverse field region
- Her macro also only used a point source for decays

Th-232 Decay chain events originating from PMT windows.
Primary Events (Black), Inside the TPC (Red), In LXe Skin (Blue)

My Slight Tweaks

- Macro now only simulates the bottom PMTs
- Includes both forward and reverse field regions
- I will likely not be able to adapt Bhwana's code directly
