

WHAT I AM DOING

- Create background radiation simulations for the Phase I detector

4/11/17

DONE

- Installed Personal BACCARAT
- Got Macro from Ryan
- Looked for vessel dimensions

TO DO

- Permission to access files?
 - Include geometry files in macro
 - Install DAWN visualization? (optional?)
 - Get macro checked
 - Run macro
- 

4/18/17

DONE

- Found (hopefully) the files for the dimensions of the vessels
- Edited the macro to include them
- Edited farmoutBACCARAT.sh to use the macro
- Started Linux tutorial

TO DO

- Transfer the macro to the server
- Run a test macro (small sample size)
- If errors arise, edit macro until it works
- Run the macro (large sample size)
