

MiniCLEAN Update

Nathan Eggen

Previously at MiniCLEAN

- Still haven't gotten Argon underground.
 - No mention of any in today's shift report.
- Power outage happened last week.
 - Charcoal trap pressure was higher than normal so warmed up charcoal trap to repump it down.
- Replaced back pressure regulator with a cryogenic one to help with condenser efficiency.
- Current IV temp is ~ 133 K at the bottom and ~ 135 at the top

Analysis Update:

- Annotated my neutron macro and analysis script
