

MiniCLEAN Update

Nathan Eggen

Overall Goals

- Don't blow up MiniCLEAN detector while cooling/filling.
- Help Hans with ROOT and Rat.

Previously at MiniCLEAN

- Finally have argon.
 - Ran Condenser last week
- Burst a 50 rupture disk last week, delayed condenser run till today.
 - Possibly due to power outage causing frozen argon to melt/evaporate.
- Will be pumping/purging in addition to using condenser.
- Current IV temp is ~ 132 K at the bottom and ~ 135 at the top
