

# Update 10/18/17

- This week:
  - Building 6 cleanroom assessment for possible LZ grid cleaning.
    - Spoiler: It's too small and LCLS2 and CDMS need more stringent UHV (ultra high vacuum) standards.
  - Comprehensive list of hardware to order.
- Next:
  - LUX bad area cut with the high-statistics Kr dataset
    - Processing of these files delayed by the problems with computer on site.
    - Present next Tuesday at LUX AWG workshop.
  - COMSOL simulations of Phase II chamber with HV connections in place.
