

Method Verificatoin

Shaun Alsum

The Not-so-good

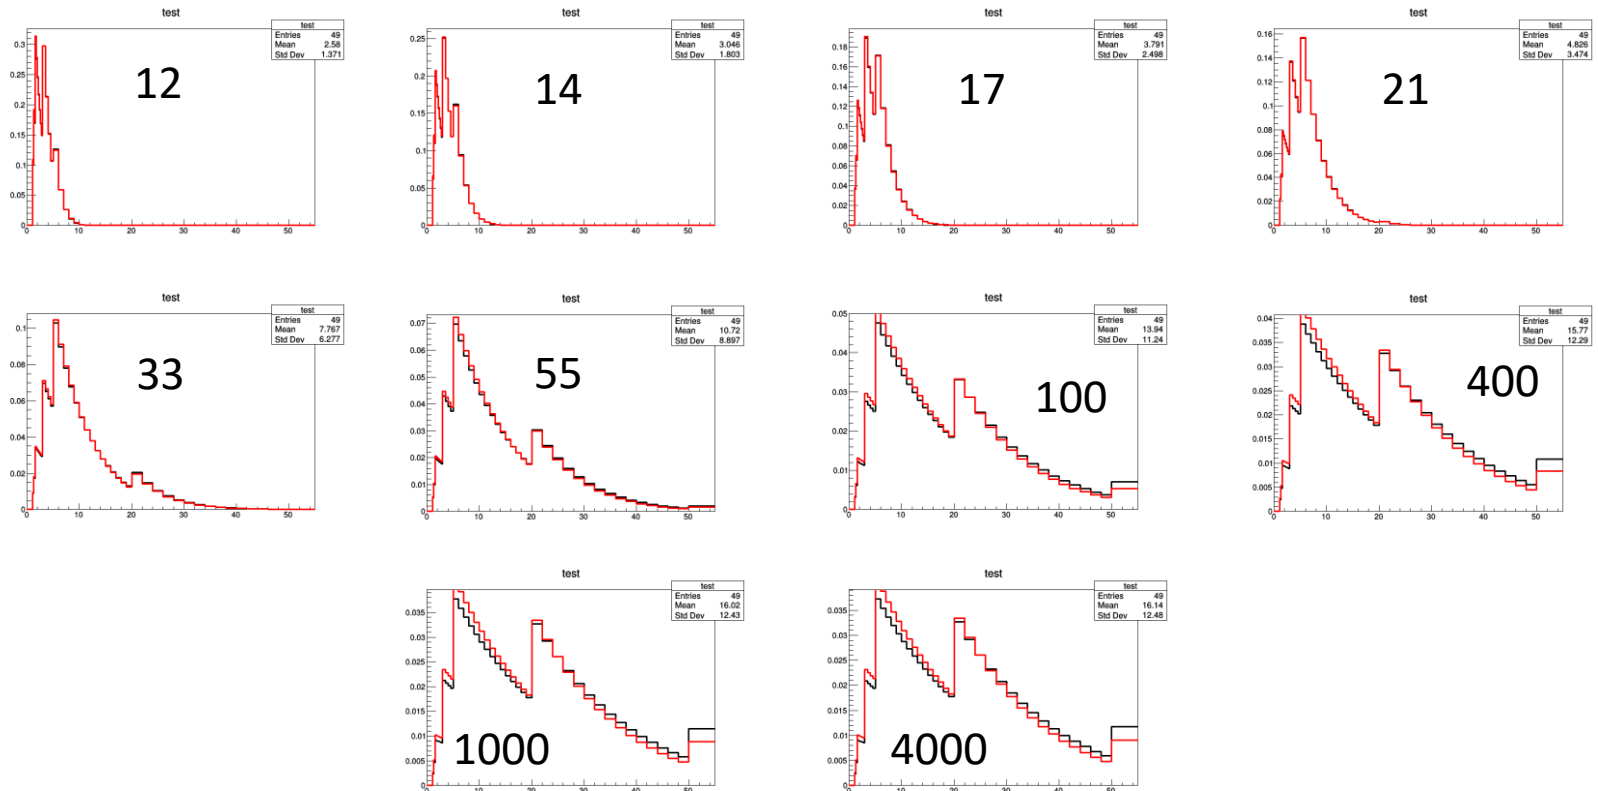

- Initial attempt: Operator 1, but WIMP-proton only

Comparing the recoil spectra

Black is EFT, Red is Standard

They *look* like they match at low energies but not at high.

The Conclusion (I hope?)

- Do a proper comparison. Standard SI in EFT is isospin invariant. I.e. $c_1^p = c_1^n \neq 0$, $c_{i \neq 1}^N = 0$.
