### Simulations and Analysis at Colliders I - Pyle Center--DE335 (2:00 PM - 4:00 PM)

| time    | [id] title   | presenter       |
|---------|--|-----------------|
| 2:00 PM | [15] Vista: a new method for an inclusive search of Tevatron Run II Data   | CONOR HENDERSON |
| 2:20 PM | [16] LHC multi-particle simulation for the MSSM and beyond                 | JUERGEN REUTER  |
| 2:40 PM | [17] Iterative discriminant analysis for charged Higgs bosons              | ANDRE SOPCZAK   |
| 3:00 PM | [18] Studies of the D0 calorimeter response using isolated charged hadrons | PETRA HAEFNER   |
| 3:20 PM | [19] High energy physics thresholds in weak-scale SUSY models              | YUDI SANTOSO    |
| 3:40 PM | [20] Reconstructing mass and spin at hadron colliders                      | BOB MCELRATH    |
