

Phenomenology 2009 Symposium - PHENO 09

Tuesday 12 May 2009

LHC 1 - Pyle Center, room 121 (14:00-16:00)

time	[id] title	presenter
14:00	[121] Color Sextet Scalars at the LHC	Dr WANG, Kai
14:15	[122] Prediction of light diquarks observable at LHC from baryogenesis models	Mr DEV, Bhupal
14:30	[123] QCD Corrections to Scalar Diquark Production at Hadron Colliders	Mr LEWIS, Ian
14:45	[124] Heavy quarks above the top at the Tevatron	Dr ATRE, Anupama
15:00	[125] Threshold resummation for production of coloured heavy particles at the LHC	Dr FALGARI, Pietro
15:15	[126] Electroweak effects in b-jet and di-jet production	Dr SCHARF, Andreas
15:30	[127] Constraining new physics with combined low and high energy observables	Dr JENKINS, James
15:45	[128] Higgs Production and Decay from TeV Scale Black Holes at the LHC	Mr ERKOCA, Arif
