

USATLAS Face-to-Face Welcome

Shawn McKee / University of Michigan, Alexei Klimentov / BNL

USATLAS F2F at [HTC26](#)

June 9-10, 2026

Welcome & Meeting Overview

- ❖ Welcome to our USATLAS face to face meeting!
- ❖ We pushed to get as many facility people here as possible to allow us to cover many important topics
 - Facility activities during the remainder of this year
 - Longer term activities for LS3
 - Planning for DC27 and HL-LHC
 - R&D discussions: what, why, who
 - Preparations for scrubbing next month
 - ...and the opportunity to reconnect and/or meet with our colleagues

Meeting Sessions Summary

Sessions Today

First Session: T1/T2 Operations and LS3 Priorities (9-10:30)

Second Session: AF and AI: Tools and Policies (11-12:30)

Third Session: Tools, R&D and Storage (15:05-17:00)

Wednesday June 10, 2026

First Session: Data Challenges and Prep for HL-LHC (9-10:30)

Second Session: WBS 2.3 Activities Review and Planning (11-12:30)

(New) Lightning Talks: What to do better for WBS 2.3?

Third Session: Closeout and Next Steps (13:30-14:30)

Notes and Goals

- We have a [Google directory](#) to hold relevant docs
- One important document is our [Meeting Notes](#)
 - Please request access if you don't already have it
 - We would very much appreciate it if you can add notes, questions, action items and decisions as they are being discussed
- During the closeout session tomorrow, **EVERYONE** has some homework to show :)
 - We want every to provide a milestone or goal for the facility
 - We also ask that everyone list the topic they think is most important or interesting for the facility
 - You can add this to our Meeting Notes (link above) at anytime in the Closeout section...just put your name in front of the milestone/goal/topic you add

Questions?
