# Common Site Operations Issues

---

- Misbehaving user jobs
  - Usually can be traced to a particular user(s)
  - Sometimes a pilot issue
  - Can also be CVMFS, Varnish, etc.
- Rucio dark data
- Condor-CE accounting data
- Disk, compute benchmarking

# How Can We Make Troubleshooting Easier?

---

- Common repository for tools
  - We currently do something similar at MWT2
  - Git repository with various systems scripts
- Recipe book for leveraging dashboards/monitoring
  - Read the Docs? Google Drive?
  - Needs to be easy for sites to contribute
